

Time2Connect (T2C) – Version 2.1.0 Release Notes

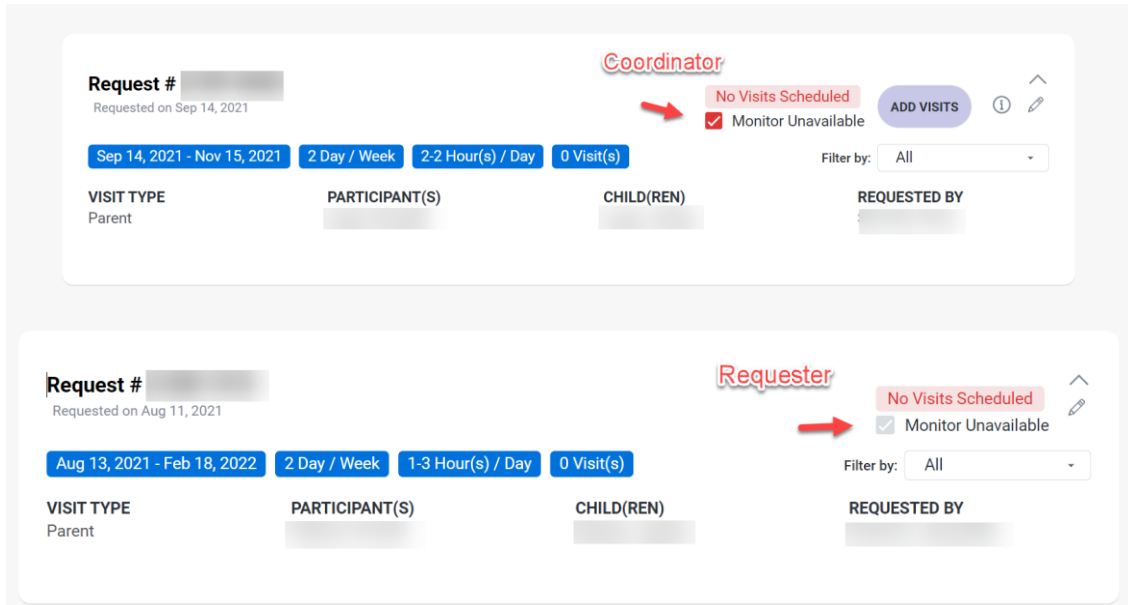

IMPLEMENTATION Date: October 2021

Module	Description
<p data-bbox="71 281 240 380">Contact Info – Language Dropdown</p> <p data-bbox="71 426 217 520">User Role: Requester, Coordinator</p>	<p data-bbox="293 281 1528 380">1. The ability to select “Spanish” from the language drop down is now available. If a participant would like to receive all of their notifications (text, robocall, email) in Spanish, please select Spanish from the drop down.</p> 
<p data-bbox="71 1115 233 1178">Case Profile – Date Display</p> <p data-bbox="71 1224 217 1287">User Role: Coordinator</p>	<p data-bbox="293 1115 1528 1213">1. A logic change to the request dates to fix an ongoing functionality issue was made. Originally when a Requester selected a date range, for example, 4/20/21-12/28/21, the date range would be displayed on the case profile page.</p>  <p data-bbox="318 1444 1507 1612">An issue would arise when a coordinator would schedule visits past that range (visits going past 12/28/21). The system would consider the visit “completed” after the 12/28/21 date, even though there were visits scheduled for future dates. Now the date range the Coordinator selects will be the displayed date range. For example, if a Requester selects 4/20/21-12/28/21, but the Coordinator selects visits to run through 3/1/22, the dates displayed will be 4/30/21-3/1/22.</p> <p data-bbox="318 1661 1539 1724">This modification will fix an issue when trying to end date a visit but are unable to since the visit would be considered “completed” and thus unable to edit.</p>

Case Profile---
Monitor
Unavailable

User Role:
Requester and
Coordinator

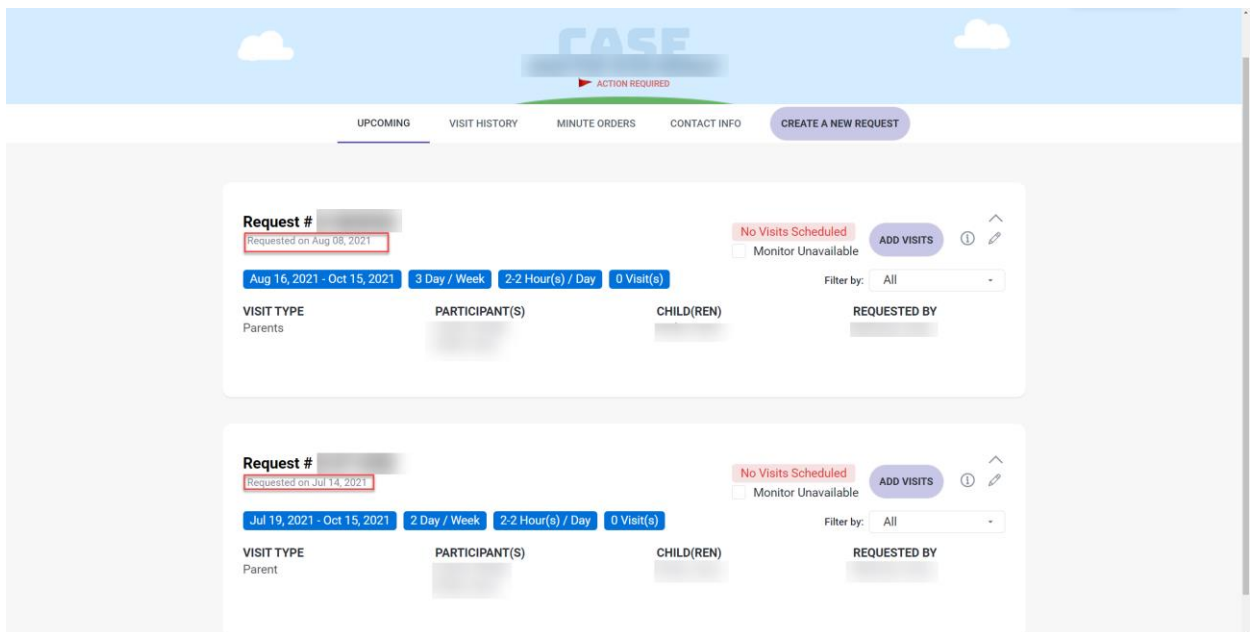

1. A small preliminary status button for Coordinators and Requesters regarding Monitor unavailability has been added. A Coordinator will now see a "Monitor Unavailable" check box on any request that needs a visit to be scheduled (red status). The box is displayed for Coordinators and Requesters, but read-only for Requesters. Currently the box is just an indicator to the Requesters from the Coordinators that there is no Monitors available for their request. A discussion with Coordinators to determine what the function behind the button should be, is pending.

Case Profile –
Request Sorting

User Role:
Requester,
Coordinator

1. All requests will now load from newest to oldest on the case profile page. Previously, oldest requests loaded at the top, requiring the user to scroll to the bottom to review the newest request.

Module	Description
<p data-bbox="71 163 253 296">Monitor Select – Email Validation Removed</p> <p data-bbox="71 342 217 405">User Role: Coordinator</p>	<p data-bbox="293 163 1446 226">1. The requirement for an email when selecting an “Other” monitor when scheduling a visit was removed.</p> <div data-bbox="293 226 1317 814"><p data-bbox="342 247 545 279">✓ Select Monitor ^</p><p data-bbox="342 331 802 384">Other v View Outlook Availability</p><p data-bbox="342 422 802 506">First Name <input data-bbox="350 453 802 506" type="text" value="John"/></p><p data-bbox="824 422 1279 506">Last Name <input data-bbox="829 453 1279 506" type="text" value="Doe"/></p><p data-bbox="342 558 802 642">Monitor Type <input <span="" data-bbox="773 611 781 621" type="text" value="Approved Relative"/>v</p><p data-bbox="824 558 1308 663">Email <input data-bbox="829 590 1279 642" type="text" value="Enter Email Address"/></p><p data-bbox="342 695 802 779">Phone Number <input data-bbox="350 726 802 779" type="text" value="(555) 555-5555"/></p></div>
